Population and Households

The size of the market area, measured by population and households, has changed from 2000 through the forecast year as follows:

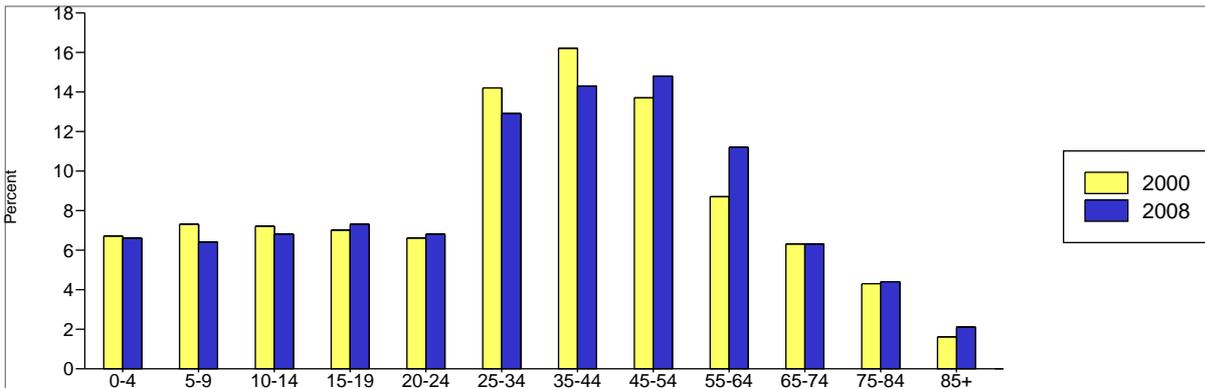

Year	Population	Households
2000	1,963,082	727,356
2008	2,048,308	758,319
2013	2,098,034	778,131

The difference between change in population and change in households is a result of two factors—the presence of group quarters (non-household) population in the market area and the average number of persons per household. The group quarters population in the market area was 56,725 in 2000, or 2.9 percent of the total population. Average household size is 2.62 in 2008, compared to 2.62 in the year 2000.

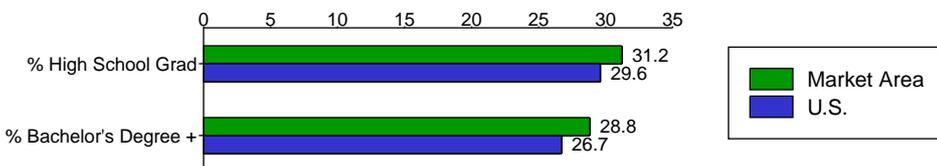

Population by Age

The median age for the United States was 35.3 in 2000 and 36.7 in the current year. In the market area, the median age of the population was 35.5, compared to 37.2 years currently. By age group, the changes in the percent distribution of the market area population show the following:

Population by Education

In 2008, the educational attainment of the population aged 25 years or older in the market area can be summarized:

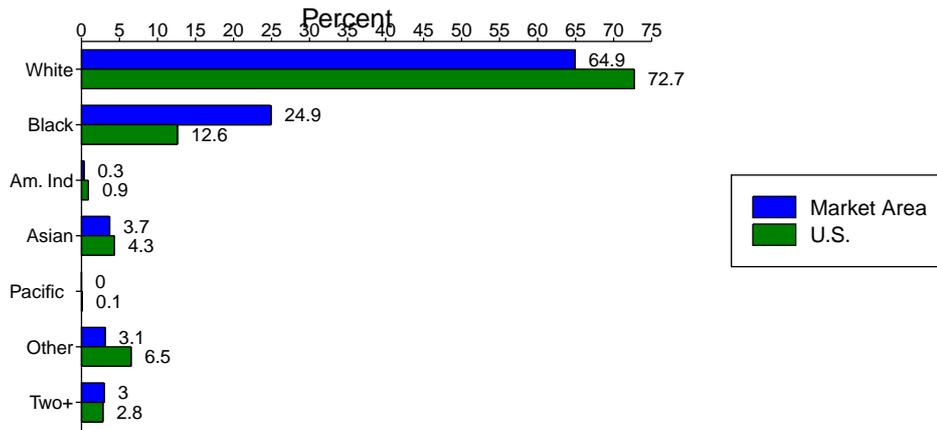

Source: U.S. Bureau of the Census, 2000 Census of Population and Housing. ESRI forecasts for 2008 and 2013. ESRI converted 1990 Census data into 2000 geography.

Congressional Districts: New York - District 1, New York - District 11 et al.

Population by Race/Ethnicity

Currently, the racial composition of the population in the market area breaks down as follows:

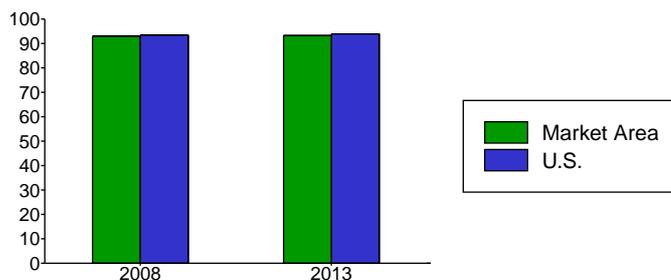

Persons of Hispanic origin represent 8.8 percent of the population in the identified market area compared to 15.0 percent of the U.S. population. Persons of Hispanic Origin may be of any race. In sum, the Diversity Index, which measures the probability that two people from the same area will be from different race/ethnic groups, was 59.3 in the identified market area, compared to 59.3 in the U.S. population.

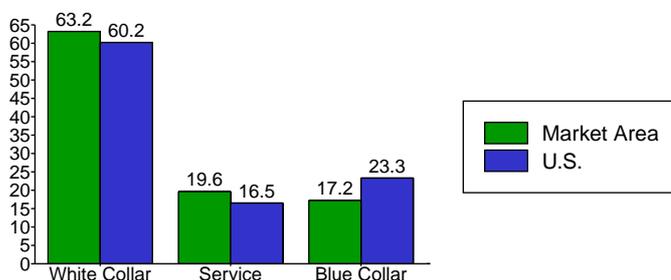

Population by Employment

In 2000, 63.4 percent of the population aged 16 years or older in the market area participated in the labor force; 0.1 percent were in the Armed Forces. Tracking the change in the labor force by unemployment status:

Year	%Employed	%Unemployed
2008	92.9	7.1
2013	93.2	6.8

And by occupational status:

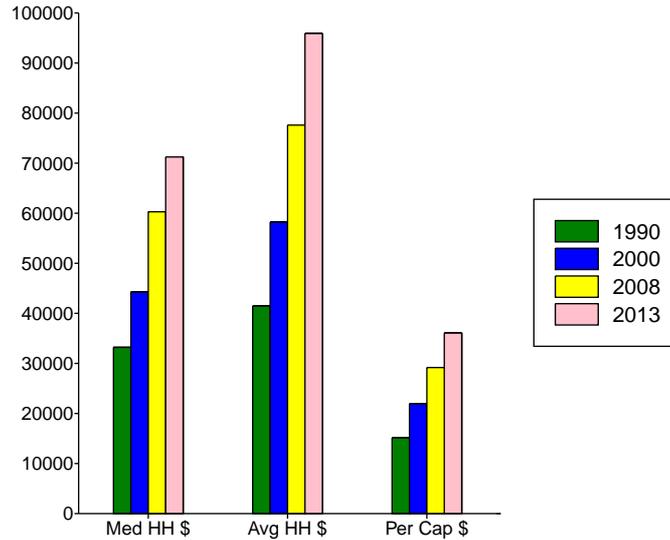

In 2000, 60.4 percent of the market area population drove alone to work, and 2.9 percent worked at home. The average travel time to work in 2000 was 31.9 minutes in the market area, compared to the U.S. average of 25.5 minutes.

Congressional Districts: New York - District 1, New York - District 11 et al.

Income

The change in three summary measures of income—median and average household income and per capita income—are shown below from 1990 through 2013:

Housing

Currently, 50.6 percent of the 853,414 housing units in the market area are owner occupied; 38.2 percent, renter occupied; and 11.1 percent are vacant. In 2000, there were 809,836 housing units— 48.2 percent owner occupied, 41.6 percent renter occupied and 10.2 percent vacant. The annual rate of change in housing units since 2000 is 0.64 percent. Median home value in the market area is \$281,356, compared to a median home value of \$192,285 for the U.S. In five years, median home value is projected to change by 0.53 percent annually to \$288,829. From 2000 to the current year, median home value changed by 8.3 percent annually.

Data Note: Net Worth is total household wealth minus debt, secured and unsecured. Net worth includes home equity, equity in pension plans, net equity in vehicles, IRAs and Keogh accounts, business equity, interest-earning assets and mutual fund shares, stocks, etc. Examples of secured debt include home mortgages and vehicle loans; examples of unsecured debt include credit card debt, certain bank loans, and other outstanding bills. Forecasts of net worth are based on the Survey of Consumer Finances, Federal Reserve Board. Detail may not sum to totals due to rounding.

Tapestry Segmentation

Tapestry Segmentation represents the fourth generation of market segmentation systems that began 30 years ago. The 65-segment Tapestry Segmentation system classifies U.S. neighborhoods based on their socioeconomic and demographic composition. Each segment is identified by its two-digit Segment Code. Match the two-digit segment labels on the map to the list below. A longer description of each segment is available at:

Top Tapestry Segments

Percent of Households by Tapestry Segment

Top Tapestry Segments:

City Strivers

City Strivers members are urban denizens of densely settled neighborhoods in major metropolitan areas such as New York City and Chicago, Illinois. Most households are composed of a mix of family types. The median age is 32.3 years, and the median household income is \$41,376. Employment is concentrated in the city, with over half of employed residents working in the service industry, particularly in health care. Twenty-two percent are government workers. Unemployment is more than twice that of the U.S. level. Housing is mostly older, rented apartments in smaller, multiunit buildings. Primary spending is for groceries, baby products, and children's essentials. Residents enjoy going to dance performances, football and basketball games, and Six Flags theme parks. They listen to urban, all-news, and jazz radio formats and watch TV, especially movies, sitcoms, news programs, courtroom TV and talk shows, tennis, and wrestling.

Pleasant-Ville

Prosperous domesticity distinguishes the settled homes of Pleasant-Ville neighborhoods. Most residents live in single-family homes with a median value of \$339,930; approximately half were built in the 1950s and 1960s. Located primarily in the Northeast and California, these households are headed by middle-aged residents, some nearing early retirement. The median age is 39.8 years. Approximately 40 percent of households include children. Home remodeling is a priority for residents who live in older homes. Shopping choices are eclectic, ranging from upscale department stores to warehouse or club stores. Sports fanatics, they attend ball games, listen to sports programs and games on the radio, and watch a variety of sports on TV.

**Congressional Districts: New York - District 1, New York - District 11
et al.**

Source: ESRI

High Rise Renters

This segment has the highest percentage of renters among all the Community Tapestry segments; more than nine in ten households are renters in these densely populated neighborhoods. Over 40 percent of the households are in buildings with 50 or more units. High Rise Renters communities are located almost entirely in the Northeast; 86 percent of the households are in New York. Residents represent a diverse mix of cultures; many speak a language other than English. The median age is 30.1 years. Household types are mainly single parent and single person. Part-time work is just as common as full time. Residents do aerobics and play soccer. They enjoy dancing; attending basketball and football games; watching movies on DVD; and listening to all-news, urban, and Hispanic radio. They watch a variety of news programs and are avid viewers of daytime TV.

Cozy and Comfortable

Cozy and Comfortable residents are settled, married, and still working. Many couples are still living in the pre-1970s, single-family homes in which they raised their children. Households are located primarily in suburban areas of the Midwest, Northeast, and South. The median age is 42.1 years, and the median home value is \$174,687. Home improvement and remodeling are important to Cozy and Comfortable residents. Although some work is contracted, homeowners take an active part in many projects, especially painting and lawn care. They play softball and golf, attend ice hockey games, watch science fiction films on DVD, and gamble at casinos. Television is significant; many households have four or more sets. Preferred cable stations include QVC, Home & Garden Television, and The History Channel.

Urban Melting Pot

The ethnically rich Urban Melting Pot neighborhoods are made up of recently settled immigrants; more than half of whom were born abroad. Half of the foreign-born residents immigrated to the United States in the last 10 years. Most rent apartments in high-density, urban canyons of large cities, primarily in New York and California. Approximately half of the housing units were built before 1950. The median age is 36.4 years, and the median household income is \$42,129. These fashion- and cost-conscious residents love to shop, from upscale retailers to warehouse/club stores. Leisure activities include going to the beach, visiting theme parks and museums, playing football, ice skating, and using Rollerblades. Distance does not deter these residents from contacting family living outside the United States. They keep in touch with phone calls and overseas travel.

Main Street, USA

Main Street, USA neighborhoods are a mix of single-family homes and multiunit dwellings found in the suburbs of smaller metropolitan cities, mainly in the Northeast, West, and Midwest. This market is similar to the United States when comparing household type, age, educational attainment, housing type, occupation, industry, and household income type distributions. The median age of 36.8 years matches that of the U.S. median. The median household income is a comfortable \$56,882. Homeownership is at 65 percent, and the median home value is \$205,391. Active members of the community, residents participate in local civic issues and work as volunteers. They take care of their lawns and gardens, and work on small home projects. They enjoy going to the beach and visiting theme parks as well as playing chess, going bowling or ice skating, and participating in aerobic exercise.

**Congressional Districts: New York - District 1, New York - District 11
et al.****Source:** ESRI**Sophisticated Squires**

Sophisticated Squires residents enjoy cultured country living in newer home developments with low density and a median home value of \$268,921. These urban escapees are primarily married-couple families, educated, and well employed. They prefer to commute to maintain their semi-rural lifestyle. The median age is 38.3 years. They do their own lawn and landscaping work as well as home improvement and remodeling projects such as installing carpet or hardwood floors and interior painting. They like to barbeque on their gas grills and make bread with their bread-making machines. This is the top market for owning three or more vehicles. Vehicles of choice are minivans and full-sized SUVs. Family activities include playing volleyball, bicycling, playing board games and cards, going to the zoo, and attending soccer and baseball games.

Laptops and Lattes

Community Tapestry's most eligible and unencumbered market, Laptops and Lattes residents are affluent, single, and still renting. They are highly educated, professional, and partial to city life, preferring major metropolitan areas such as New York, Los Angeles, San Francisco, Boston, and Chicago. The median household income is \$101,325; the median age is 38.5 years. Technologically savvy, this is the top market for owning a laptop or notebook PC; they use the Internet on a daily basis, especially to shop. Their favorite department store, by far, is Banana Republic. Leisure activities include going to the movies, rock concerts, shows, museums, and nightclubs. These residents exercise regularly and take vitamins. They enjoy yoga, jogging, skiing, reading, watching foreign films on DVD, dining out, and traveling abroad. They embrace liberal philosophies and work for environmental causes.

Wealthy Seaboard Suburbs

Wealthy Seaboard Suburbs neighborhoods are established quarters of affluence located in coastal metropolitan areas, primarily along the California, New York, New Jersey, and New England coasts. Neighborhoods are older and slow to change, with a median home value that exceeds \$471,252. Households consist of married-couple families. Over half of employed persons are in management and professional occupations. The median age is 42.3 years. Residents enjoy traveling and shopping. They prefer to shop at Macy's, and Nordstrom as well as BJ's Wholesale Club and Costco. They also purchase many items online or by phone. Residents take nice vacations, traveling in the United States and abroad. Europe; Hawaii; Atlantic City, New Jersey; Las Vegas, Nevada; and Disneyland are popular destinations. Leisure activities include going to the beach, skiing, ice skating, and attending theater performances.

Prosperous Empty Nesters

Prosperous Empty Nesters neighborhoods are well established, located throughout the United States; approximately one-third are on the eastern seaboard. The median age is 48.7 years. More than half of the householders are aged 55 or older. Forty percent of household types are married couples with no children living at home. Educated and experienced, residents are enjoying the life stage transition from child rearing to retirement. The median household income is \$70,623. Residents place a high value on their physical and financial well-being and take an active interest in their homes and communities. They travel extensively, both at home and abroad. Leisure activities include refinishing furniture, playing golf, attending sports events, and reading mysteries. Civic participation includes joining civic clubs, engaging in fund-raising, and working as volunteers.

Data Note: This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The Index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the U.S. average. Tapestry segment descriptions can be found at <http://www.esri.com/library/whitepapers/pdfs/community-tapestry.pdf>
